Pistol Scopes: Long eye relief attachments and gunsmithing on pistol scope mounts!!!!!

We recommend the use of Buehler mounts and rings where possible. Buehler mounts sell for $21.50, complete with rings. Installation of the mount runs around $6.00 in most cases. Buehler mounts are available for the following guns:

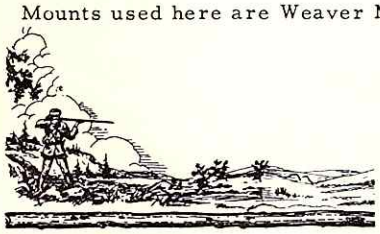
SMITH & WESSON - all master piece and combat masterpiece, all magnums.
(They include all K frames and S frame guns).
RUGER - All Blackhawk Models.
COLT:- Officers Model Match and most magnum frames.

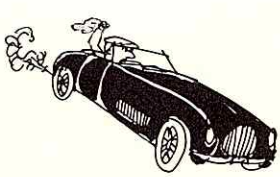
On all other guns, we suggest you use a Weaver Top Mount. This mount sells for $9.75, complete with one inch rings. Normal installation is $6.00. However, this price of $6.00 can vary considerably where there are no Weaver bases which are adjustable. If we must machine a base, the labor charge would go as high as $15.00.

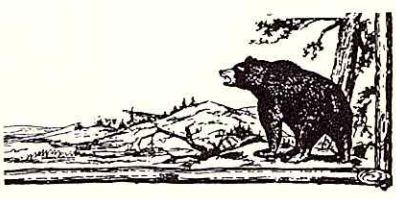
As far as the scope is concerned, we recommend the use of any K Model Weaver Scope. These scopes are priced as follows:
K25, K3, $37.50
K4, $45.00
K6, $48.50
K8, K10, $49.50

We recommend the Weaver K scopes because Litschert makes an excellent long eye relief attachment for these scopes. Any scopes can be used, but with most, the gun must be held very close to the eye, which produces poor results. The use of the Litschert attachment enables the gun to be held at full arms length. This Litschert attachment sells for $12.00. (May be used successfully on Winchester 94 with top mounted scope to allow proper ejection.)
NOTE: The use of the Litschert attachment cuts the power of the scope in half. e.g., a 4x Weaver becomes a 2x scope. This attachment is made only for Weaver scope. There is a low cost 6x Pan Tech. Scope available for use on 22 caliber guns. This unit sells for $14.95 with clamp on mount.
Suppra Nickel also makes a LX Scope at $57.50. And a 1-1/2x Scope at $65.00.

Mounts used here are Weaver Mounts.....







6MM/06.....The Famous 1000 Yard Chuck Rifle Described in Field & Stream Magazine!!

We chamber 6MM Rifles for the 6MM/06 Roche. We will not chamber rifles of foreign manufacture for this cartridge, unless we rebarrel at the same time. We have found foreign bore diameters very tight, and pressures run dangerously high with the 6MM/06. Some guns require further alterations of the magazines, bolt stops, ejectors, etc. We use only the best grade barrels, which give maximum accuracy. We will not rebarrel in this caliber with any other barrel. Several barrel weights are available. We strongly recommend you let us accurize your rifle in our shop. All the velocity in the world will not kill varmints at 1000 yards unless the gun shoots very, very accurately. The only factory barrels we suggest, that can be retained in a good conversion, is the Winchester 70 Varminter or Target Grade. We suggest the use of the very best Unertl Target Scope you can afford in 15X. We recommend the 15X Ultra Varmint Scope, with calibrated head, priced at $132.50.

CUSTOM TRIGGERS INSTALLED, $15.00 (and up)

The load that we recommend for the 6MM/06 are as follows:
FIREFORM with 55 gr 4350 with 85 gr bullet.

After fireforming, use 57-1/2 grs. 4350

After about 500 rounds have been fired through the barrel, this load may be standardized at approximately 58-1/2 grs., 4350, with 85 gr. Sierra bullet. Muzzle velocity is approximately 3,700 F.P.S.

For those who have no reloading equipment, we can supply you with a complete set. If you do not care to load yourself, we can develop a load and fireform cases, etc., for you while we are reworking your rifle.

CONVERSION OF YOUR .30M1 CARBINE TO .22 CENTERFIRE Hi-VELOCITY

NEW!!! NEW!!! NEW!!! - THE .22 ORESKY

The conversion uses a .22 cartridge with ballistics equal to or better than the .218 BEE, feeding through the normal G.I. magazine and functioning the gas operated action. The barrel is a new manufacture, not sleeved reclaimed G.I. stuff, and resembles the issue barrel. Sold with issue front sight and sling swivel band.

Ammunition is formed from .30 G.I. brass in one pass and needs no trimming or reaming. Bullet seating is limited only by overall length to permit feeding through the magazine. Loading dies are included in the price of the kit, the sizing die decaps and forms the brass. Seating die is the non-crimping type. Set the dies to fit your chamber for perfect ammo.

****

OPTION #1: PRICE $59.00, for one complete barrel and set of dies. This barrel will be chambered and ready to install. Please include $2.00 postage; any excess will be returned. Full instructions will be sent with your kit; and if you do not have the few tools required, your gas station will.
OPTION #2: PRICE $59.00, for one completed job and set of dies when you send your complete gun to me. This will include free assembly, chambering and function firing. The free installation is your trade-in allowance for your issue barrel which I remove and keep. Please be fair - no smooth-bores, rusted out, bent, burned, or sleeved barrels. When you ship, add the same amount to your M.O. for return postage. Pack securely, the same box will be used to return the completed gun.

DELUX SAFARI RIFLE fabricated by Parker-Hale Ltd. Unlike most production rifles on the market today, these fine arms are made by Gunsmiths, not Blacksmiths. When you throw one of these sporters to your shoulder, you can see and feel the difference imediately. Guns are built on Mauser action with trigger guard and magazine box both milled out of the same piece of steel. No stamped tin parts as on most other sporters.

An entirely new concept in weapons.

This super-accurate defense weapon is now perfectly legal and available to U.S. citizens over the age of 21. Especially designed for civilian defense work. Never before has there been anything like this weapon either on U.S. or foreign markets. It closely resembles the world famous "Tommy Gun." Not only does this weapon look like the "Chicago Typewriter," but it has more potential firepower than any gun since. With world conditions the way they are today, this weapon becomes a must. It is the perfect weapon for civilian defense, house to house fighting, jungle warfare, repulsing enemy paratrooper attack, normal hunting or target shooting. Ammunition is cheap and easily obtainable in case of national emergency.
